

CONFERENCE CALLING
MADE EASY, SIMPLE
AND SMART.

WHAT IS CONFERENCE CALL?

Conference Call by Meetupcall is an innovative, cloud-based conferencing system, allowing you to arrange, join and manage your meetings whenever, wherever.

Conference Call provides a secure, simple to use platform with unlimited calls for a single, cost-effective monthly fee. This, coupled with Conference Call's impeccable

HD audio solution, time-saving features and easy to use screenshare capability will help you not only save money by avoiding the common issues that arise during a standard costly teleconference system; but you'll also be able to have a better sounding call than ever before, whether you're on the move or in the office.

SIMPLE, INTUITIVE AND CUSTOMISABLE

Take control of your conference call.

With Conference Call's innovative dashboard, you can access and manage your meetings across any device, in a matter of minutes. All attendees can see the profile pictures, job titles and locations of everyone on the call and see exactly who is talking at any one time, whilst the

leader can mute or remove any attendees if they need to.

These features not only make your conference calls more interactive, but are also designed to make the whole process easier and more efficient.

SAVE TIME WITH EASY INVITE

Set up a conference call in minutes.

Setting up meetings has never been so easy with the Easy Invite feature. Arrange, amend and join meetings on any device at the click of a button. With Easy Invite, you can schedule a meeting straight from your calendar in just a few seconds, without the need to download any software.

If attendees need a reminder, Conference Call will send a confirmation email, including the call details, to all attendees prior to the call to ensure everyone is on time.

If you have international attendees, Easy Invite takes into consideration different times zones, meaning arranging a meeting is hassle-free.

JOIN MEETINGS IN SECONDS

No PINs, no ID numbers. One tap and you're in.

Attendees struggling to remember the leader PIN, phone number and conference room ID for a call can be annoying and costly. So, it's time to say goodbye to frustrating conference calling.

Conference Call introduces a unique one-touch dial-in system allowing you to meet on the go. Designed to

maximise convenience, this feature removes the need for you and attendees to memorise lengthy passcodes and dial-in numbers. In turn, Conference Call saves you time by avoiding scenarios where latecomers struggle to join a call while they search for numbers or passwords.

IT STARTS**

NEVER MISS A MEETING AGAIN

The conference call service that rings you.

Make waiting around a thing of the past with Conference Call's dial-out feature. Designed to save time and money, the dial-out feature calls you and your attendees just as the meeting is about to start, so you won't be waiting for people to turn up.

Not only does the dial-out feature ensure your attendees are always on time, but it also removes any complications when it comes to paying for the call. With dial-out, you can phone the people you want in the conference call, and then split the bill between you and the attendees to distribute the costs fairly.

NO MORE NOTE TAKING

Never miss an important conversation again.

One of Conference Call's most useful and time-saving features is the ability to record every part of the conversation, leaving you to focus on the meeting at hand, rather than frantically scribbling down notes.

You can rest assured with the knowledge that conference call recordings are securely archived for a year, in compliance with GDPR regulations, for you to play back at a later date, or to send to those who were unable to attend the call.
